

PIG® Lite-Dri® Loose Absorbent

#PLP201 - Absorbs Oils, Coolants, Solvents & Water • 1 - 22 lb. Bag

Silica-free loose absorbent for most common industrial liquids is easier to lift and lighter to carry than clay — plus it's 3X more absorbent.

- Unlike clay, which is simply coated with liquid, fast-wicking recycled cellulose actually soaks up the spill the moment it touches
- Three times more absorbent means you'll use less material on the spill, reducing your labor and disposal costs
- Silica-free composition is non-abrasive and does not pose the health hazards associated with breathing in clay dust
- Non-abrasive composition won't harm finished floors or damage expensive machinery
- Light-weight absorbent is easier than clay to carry and use without injury
- Absorbs and retains oils, coolants, solvents and water
- Bag features a built-in handle for easy portability, handling and dispersal
- Recycled cellulose is ideal when green products are desired or required
- Can be incinerated after use to reduce waste or for fuels blending
